

IN THE SPECIFICATION:

Please amend the specification as follows:

Please replace the paragraphs beginning on page 4, line 5 and ending on page 5, line 13 with the following new paragraphs:

Consistent with an aspect of the present invention, ~~The aspect defined in claim 2~~
~~according to the aspect defined in claim 1 is characterized in that~~ when new user manipulation is
done within the ON time, the backlight means updates the ON time.

Consistent with an aspect of the present invention, ~~The aspect defined in claim 3~~
~~according to the aspect defined in claim 1 is characterized in that~~ when an information reception
mode via a radio channel is selected, the control means prolongs the ON time.

Consistent with an aspect of the present invention, ~~The aspect defined in claim 4~~
~~according to the aspect defined in claim 1 is characterized in that~~ when a mail creation mode is
selected, the control means prolongs the ON time.

Consistent with an aspect of the present invention, ~~The aspect defined in claim 5~~
~~according to the aspect defined in claim 1 is characterized in that~~ when a mail browsing mode is
selected, the control means prolongs the ON time.

The present invention may provide ~~The aspect defined in claim 6 is characterized by a~~
control method for a radio communication terminal having display means for displaying
information to a user, and backlight means for illumination the display means with a light beam
in correspondence with user manipulation, thereby improving visibility, comprising determining
a function selected by the user, and changing an ON time of the backlight means after the user
manipulation in correspondence with the determined function.
